

I do not want the FCC to enact any law that would lessen Indiana's Telephone Privacy Law. I could not locate the exact number of residents who have signed up for it, but I know it is in the 6 figure range. It has made life at home much more enjoyable without telemarketers calling every 15 minutes. I also think our law should be tightened up to include the 4 categories currently exempt from this law. Let the residents of Indiana decide what the law should be. Thank you, Brad Walker
